With a wide choice of models, Dimplex convectors are ideal for use in any room (except bathrooms) where there is no heating or heat is required unexpectedly.

Features
- Thermostatic control
- Range of models with outputs from 2kW - 3kW
- Unique forward facing grille designed for enhanced heat throw
- Integrated 24 hour timer*
- Freestanding or wall mountable
- DXC30FTi also features turbo boost for an extra heat boost
- Supplied with feet, wall brackets, cable and fitted plug
- 3 year guarantee
- Colour: white/graphite grey
- Heater guards for this product range are available from Aiano.

*model specific
Convector Heaters - Contrast

Technical Specification

**Controls**
All models are provided with variable thermostatic control.

**Colour/Finish**
White/graphite grey.

---

Convector Heaters - Contrast

**24-hour Programmable Timer**
Models DXC20Ti, DXC30Ti and DXC30FTi incorporate a 24-hour timer. This enables daily heating needs to be programmed in advance. A manual override enables the heater to provide instant heat during an 'off' period without affecting the pre-set programme.

**Wall Mountable**
All models within the range are wall mountable, making them ideal for applications where a portable heater is not required, particularly in commercial situations such as temporary and site accommodation.

Bathrooms
Any electrical appliances installed in a bathroom should be fitted by a competent electrician in accordance with the current I.E.E. Regulations. Portable heaters are NOT suitable for use in a bathroom. Unless otherwise specified, heaters that can be permanently fixed have to be mounted so that any controls cannot be reached by a person using a bath or shower. This restriction does not apply to Dimplex heated towel rails, which do not have controls.

Safety
Dimplex products are designed to comply with EN60335 the British Standard covering the safety requirements of electric heating appliances, and momentary contact with any part of the heater should not cause injury. However, in order to be effective, heaters or towel rails of any type do get hot especially (if applicable) around the air outlet grille. Therefore if aged or infirm persons, or young children, are likely to be left unsupervised in the vicinity of a heater we advise that precautions should be taken. We recommend that a guard is fitted around the heater, as is normal with many types of heating appliances in similar circumstances, to ensure contact with the heater is avoided and objects cannot be inserted into the product. Heating appliances should never be covered or positioned where objects may fall onto them.

Specifications
Dimplex policy is one of continuous improvement. The company therefore reserves the right to alter specifications without notice. Although every care is taken in the reproduction of product finish in this brochure, the colour photographs should be taken as a guide only. This information is correct at the time of printing. You are advised to consult your dealer before purchasing.

Plugs
All portable appliances are supplied with a fitted plug.

British Electrotechnical Approvals Board - BEAB Approved
The mark of the British Electrotechnical Approvals Board signifies that the appliance bearing it has been produced to the stringent safety requirements for domestic electrical appliances as laid down in EN60355.

CE Mark
Products carrying the CE mark comply with European safety standards and the European Standard for electromagnetic compatibility.

Installation Guidance
This information is designed to assist you with your choice of Dimplex products and it is not intended as an installation guide. For safety, products should only be installed by a competent person, in accordance with current regulations and the manufacturers instruction. If you require advice concerning the installation of our products – especially where the installed dimensions may be critical and the location of the product – please consult your supplier.
Please note that the dimensions contained within this publication do not in all cases include clearances required around installed product for safe operation.
