

Logitech®
TrackMan® Marble® Wheel
 Optical Trackball

Comfort and enhanced performance

TrackMan® Marble® Wheel combines an easy-to-use scroll wheel with the smooth motion and superior performance of Logitech's patented, optical Marble technology. This gently curved three-button design features a trackball positioned for thumb control, and provides fast, precise cursor movement. Logitech's innovative wheel button is a true wheel that saves you time scrolling through documents in Windows®, Mac® OS 8.5 and the Internet.

Never use scroll bars again

With the scrolling wheel, you can scroll from wherever your cursor rests without having to move over to the scroll bars. Just turn the wheel. It's also this simple to zoom in Microsoft® Office® 97, Office® 2000; you never have to touch your keyboard or take your eyes off your work. Clicking the scroll wheel gives you the ability to AutoScroll, allowing you to scroll diagonally or in any other direction by rotating the trackball. Scroll freely through documents, such as spreadsheets,

which are larger than the screen and control the speed with the trackball.

The advantage of optical Marble® sensing technology

Patented, optical Marble sensing technology eliminates the moving parts of mechanical trackballs. A laser-like beam illuminates dots printed on the ball, while an optical sensor tracks the motion. This gives you precision, reduces wear, and ensures smooth tracking, even if the ball gets dirty or scratched. Because it records motion optically, there's no need for regular cleaning. Only Logitech's trackball family has marble technology.

Personalize your performance

Award-winning MouseWare® software makes it simple to personalize your performance by assigning one-click commands to the TrackMan Marble Wheel buttons. For example, you can assign draglock or double click to these buttons. For draglock, click the button and roll the trackball to drag. For

Logitech® TrackMan® Marble® Wheel

Optical Trackball

double click, just click the button once and it double clicks for you. Or, customize the buttons with cut, paste, page up, page down, task list, or many other shortcuts.

It's easy to assign commands. Just double click on the mouse icon to open the Mouse Control Center and highlight the command you wish to use. MouseWare® also lets you easily personalize the cursor size, sensitivity and orientation of movement.

Experience Logitech quality

This revolutionary thumb-operated trackball is built for a long life by Logitech. For more than a decade, Logitech has been making trackballs and mice of uncompromising quality. We've designed, manufactured and shipped over 200 million of them.

Warranty

The Logitech® TrackMan® Marble® Wheel includes a 5-year warranty (see details inside the box).
